

## What we read - because we need to know whatever there is to know

Decision making might be tougher now than it has been for most of our careers. Today, we all have unprecedented needs for reliable info sources.

“Grassroots” style info sharing is proving to be a critical way to stay informed. Rx-360's member working groups, like “Supply Chain Security Logistics”, are incredibly valuable through the current period of rapid-fire change in business regulations and operations.

Here are just a few of our favorite go-to resources that help guide our working group agendas:

- [Industry Dive](#) - with various publications, such as Healthcare Dive and PharmaVoice; keeping business leaders updated on the latest news and trends affecting their areas of interest
- [Pharmaceutical Online](#) - for niche-to-general topics impacting those who work within small molecule drug manufacturing – process development, chemical synthesis, purification, formulation, quality control, packaging, and distribution
- [Securing Industry](#) - providing practical advice and intelligence to help manufacturers define and pursue their own strategies for tackling crime, including counterfeiting, product diversion, adulteration, and theft
- [Flexport](#) - a tech-driven freight forwarding and supply chain management company that simplifies international shipping for businesses with extensive expertise in trade policy, hosting regular webinars to provide real-time updates on the ongoing effects of tariffs and awareness of ongoing changes to trade policy
- [Overhaul](#) - a tech company providing supply chain visibility, security, and risk management solutions for logistics and transportation; offering various resources, including industry reports, whitepapers, blog posts, and research articles that cover topics such as best practices in supply chain visibility, the impact of technology on logistics, and strategies to mitigate risks in transportation
- [Supply Chain Risk Management, An Emerging Discipline](#) - Gregory Schlegel and Robert Trent present a risk management framework that helps readers position and conceptualize the topic of supply chain risk management; published in 2014, it remains relevant, especially in our current supply chain operating environment

Find out if you work for a member organization – and can join our working groups now – or consider leading the initiative to join Rx-360 on behalf of your company. Inquire at [info@rx-360.org](mailto:info@rx-360.org).
