

Become a Key Player in Protecting Patient Safety

Rx-360 Member Value

Rx-360 is a 501c6, internationally-based nonprofit. With corporate offices in Philadelphia, PA, we have a mission to enhance supply chain integrity, material quality, and improve patient safety within the pharmaceutical industry. We are a member-based consortium made up of pharmaceutical organizations. As a nonprofit, Rx-360 contributes to member organizations' corporate social responsibility efforts, aiding them to operate in an economically and socially sustainable manner.

Membership entitles you to participate in:

Topical and confidential discussion/working groups.

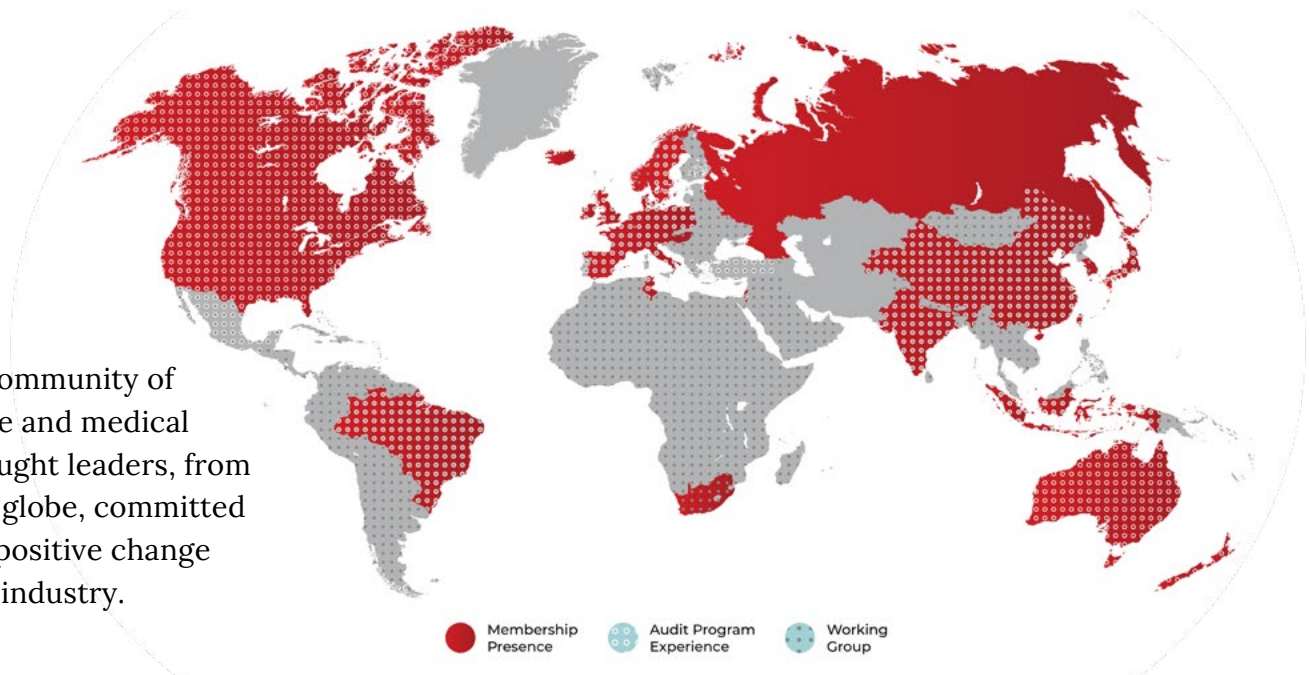

These confidential groups allow you to benchmark with your industry peers to create best practices, survey the industry to help in your organizational needs, share ideas to improve your own organization, and publish papers on topics that align with the Rx-360 mission.

Best-in-class Joint Audit Program®

Membership also provides you with enhanced involvement in our Joint Audit Program®, including discounts on audit report licensing, opportunities through our credit program to mitigate your audit expense, and the ability to confidentially co-sponsor audits of your supplier base.

We are a community of life-science and medical device thought leaders, from across the globe, committed to driving positive change within the industry.

What to expect as a member

- Access to exclusive confidential Working Groups that target your needs and interests.
- Integration into the Rx-360 Audit Program, which includes discounts on audit licenses, opportunities to co-sponsor audits, and reduce your audit cost burden through our unique credit program.
- Unparalleled customer service from our growing and dedicated internal Rx-360 Team.
- Opportunities to publish and present through our working group projects and educational events.
- Your membership provides you the knowledge and access to increase your pharmaceutical supply chain security, and quality.

Join the Movement to Ensure Patient Safety!

"As our company continues to develop our DI program, this team participation has allowed for valuable benchmarking from other companies before putting processes in place. Regulations tell us what to do but most often not how to comply so sharing is essential. I can say only positive things about both the participants and host(s) of our working group."

Daniel Ewald
Boehringer Ingelheim

"Rx-360 is like an active "Neighborhood watch" group that focuses on keeping the supply of medical products safe for patients worldwide. I am thankful that my company and so many of our peer and supplier companies are committed to working together on rx-360's supply chain security mission on behalf of our patients!"

Eric Berg
Amgen, Inc.
